Subject: **Recycled Content**

CLOW Canada, a Division of Canada Pipe Ltd., is proud to support sustainable building programs and projects. Most of the significant weight components in CLOW Canada products are cast at corporate owned facilities. Brass parts are cast from 95% post consumer recycled ingot. Ductile and cast iron parts consist of no less than 48.8% and 90% respectively.

Post-consumer recycled content* by weight of CLOW Canada products, calculated by parts analysis, is presented in the following table:

	Model / Type	Minimum Recycled Content*
RW Valves	C509 – Cast Iron	90%
	C509 – Ductile	82%
	C515 – Ductile: 2” – 12”	82%
	C515 – Ductile: over 12”	80%
Hydrants	M67 Brigadier Hydrant	80%
	D67M-P Premier Hydrant	79%
	Heritage	77%
Service Boxes	43” to 79”	90%

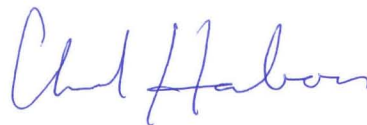

* as defined by LEED – New Construction and Major Renovation version 2.2

Thank you for your interest in CLOW Canada products. If you have any further questions please call our Sales Department at 1-800-561-9931. They will be more than happy to assist you.

Sincerely,
